GUNSHOT DETECTION

All-In-One Solution to Safeguard Your Facility and Streamline Emergency Response

CAPABILITIES

All-In-One Solution

Leverage audio sensors already built into your mass notification IP displays and speakers to detect gunshots

Leverages Network of Endpoints

IP PoE devices installed throughout the building actively monitor and work together to detect gunshots

Identifies Gunshot Location

The alert includes the name and location of the device that detected the gunshot

Proven Technology

Designed by ANetD's machine learning experts who develop life-protecting technology for the US military

Engineered for Accuracy

Extensive testing with gunshots and other sounds to help train the system

Manage with Software

Works with ClockWise Campus and integrates with Singlewire Software InformaCast Fusion

SEQUENCE OF EVENTS

DETECT

Within seconds of a fired gunshot, the built-in audio sensors detect and record the sound

VERIFY

Audio recording provided for verification and location

NOTIFY

Once verified, trigger an immediate lockdown and call first responders
